7. Help page

This page consists of the most frequently asked questions

8. Policy page

In this page we show the policy related to privacy.

1.2 Reusable components

To scale our application, we need to use reusable components across the application. These components can be used in different pages. And multiple times in a single page.

In our application we can have 4 main reusable components they are as follows

1.2.1 Navbar

Navbar element should be present in every page so it is good idea to have it as a separate component.

Figure 1. Navbar

1.2.2 Footer

Footers on websites should be visible in every page so it can also be a separate component on its own.

Figure 2. Footer

1.2.3 Book Card Component

Details of books can be shown in an intuitive way using card design. This component can be reused for different books.

Figure 3. Book Card Component

1.2.4 Search Card Component

When searching API returns array of results, we can show it to the user using card design this component can be reused in the project.
